

# Health Hazards of Genetically Engineered (GE) Food

Riesgos de OMG para la Salud — en español

PRESENTED BY Jan Dietrick, MPH

Are you comfortable being a guinea pig for genetically modified organisms (GMOs) in food? You already are! The American Academy of Environmental Medicine calls on all doctors to prescribe non-GE food for all patients, yet over 70% of food contains GE ingredients with no labeling. Learn more in a discussion about GE food and the ballot initiative to label genetically modified organisms or GMOs.

**Thursday, January 26th**  
**6:00 - 8:00 p.m.**  
**900 East Main St**  
**Santa Paula, CA**

Free one hour workshop at 6 p.m. followed by one hour training for volunteer signature gatherers 7-8 p.m. Training is open to all – no commitment to volunteer.

About Jan Dietrick...

Jan earned a Masters in Public Health and worked as a registered dietitian. She is involved in the food business and has written for Agribusiness Fresh Fruit and Raisin News, IPM Practitioner, and Acres USA. She is editing a book about how to help beneficial insects win over farm pests in ecologically based farm systems.
